OPI Colour at the speed of light!

Dear Esteemed Beauty Therapist / NailTech,

As you are aware, OPI launched the **OPI GelColors** end of last year! A faster-curing, thinner formula than any other coloured gel on the market!

Unlike gel and polish hybrids, OPI's formula is 100% gel, which lasts for a minimum of two to three weeks. **OPI GelColors have a chip-free finish** no thicker than nail polish while maintaining the **OPI high shine**. GelColor comes in familiar OPI bottles with brush applicators and paints on like a regular polish. It cures under LED light in just **30 seconds** per coat ! It can **also cure in any UV light source too ! Total application takes four minutes** for a full set of hands or feet. It can be easily removed in 10-15 minutes without the need to buff the product and without nail or cuticle damage! And also ... **OPI GelColors are more competitively priced** than the other gel colours **on the market** meaning that using **OPI GelColors, you will gain more profits!!**

We have had many OPI GelColor WorkShops which were quite a success in these past years! If have not had the pleasure of attending one of these informative Hands-On WorkShops, we invite you to join us and experience the **OPI GelColor** easy application.

This 3-hour WorkShops are held at our Training Premises in Fleur-de-Lys, B'Kara. Participants are kindly requested to **bring their LED or UV gel curing unit** to use during the OPI Hands-On WorkShop, so that we can show you the outstanding performance of **OPI GelColor** using your own unit! If you do not own an LED or UV light, no problem, you may use one of our units!

The OPI GelColor WorkShop is **FREE**, however a deposit of €25 per person is solicited to book your attendance. This deposit will be **deducted from any purchase of OPI Products of your choice** on the same day. Furthermore we would also like to inform you that **an extra Special Attendance Discount will be given to all participants on any OPI cash purchases on the day.**

Kindly contact us so that you may find out the dates of our next OPI GelColor WorkShops and confirm your attendance, by sending us the booking form attached together with your redeemable deposit.

Why should you use the mass market product when you can use **Professional OPI GelColor at a MORE COMPETITIVE PRICE?!** Start using the world acclaimed OPI GelColors NOW and increase your profits drastically!

It will be our pleasure to demonstrate to you the performance of **OPI GelColor** and look forward to seeing you at one of our **OPI GelColor WorkShops.**

Thanks and best regards,

Angèle Stafrace
